

OEM 54410-38000 54420-38000 5441038000 5442038000 Wishbone Suspension Arm

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 54410-38000
- Minimum Order Quantity: 20 PCS
- Price: USD12.85 ~ USD14.88
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 5000 pcs per month

Product Specification

- Product Name: Suspension Control Arm
- Package: Poly Bag With Cartons, After Wooden Pallets
- Warranty: 12 Months
- Car Make: For Hyundai
- Size: Standard
- OEM: 54410-38000
- Highlight: 54410-38000, 54420-38000

Product Description

54410-38000 54420-38000 Suspension Control Arm For hyundai Accent Kia 5441038000 5442038000

Product Description:

A **control arm**, also known as an A-arm or *wishbone*, is an essential component of a vehicle's suspension system. It plays an important role in connecting the suspension components to the vehicle's chassis and governing the motion of the wheels. Control arms are usually found in a vehicle's both front and rear suspension systems, although their design and layout vary.

Features:

Superior Construction: Our control arm is crafted from the highest quality materials, such as forged or cast steel, aluminum, or composite materials. This ensures that the arm is strong, durable, and able to resist wear and corrosion caused by exposure to the elements when driving and tackling varying road conditions.

Suspension Control: This arm is an essential link between suspension components such as the wheel hub assembly and steering knuckle and the vehicle's chassis. It provides necessary structural support and flexibility to control the motion of the wheels, keeping correct wheel alignment and improving handling and stability.

Precise Wheel Alignment: Maintaining the proper wheel alignment is fundamental for even tire wear, efficient car handling, and improved vehicle stability. The control arm enables controlled vertical movement of the wheels, resulting in enhanced traction and responsiveness during acceleration, braking, and cornering.

Easy Installation: Our control arm is designed to be easily installed, thus suitable for both professionals and the average car owner. It is a direct fit replacement of the original control arm of the vehicle, providing compatibility and a simple installation process.

Quality Assurance: We take quality assurance measures very seriously. All our control arms are subject to rigorous testing and quality checks that ensure that they meet or exceed industry standards. We also ensure that the products are provided by trusted suppliers who value quality and performance, resulting in a reliable and durable product.

Support and Services:

Technical Support and Service for Suspension Control Arm

We provide technical support and service for our Suspension Control Arm product. Our team of specialists is available to answer any questions you may have about installation, operation, and maintenance. We also provide troubleshooting and repair services, as well as replacement parts if needed.

If you need any assistance, please feel free to contact us. Our team is available to help you with any questions or concerns.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specializing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
